

The Myth of the Golden Ear and Audio

AN AUDIO/VIDEO SYSTEM IS A VEHICLE FOR CONVEYING THE VAST EMOTIONAL AND INTELLECTUAL POTENTIAL OF THE MUSIC. THE HIGHER THE QUALITY OF REPRODUCTION, THE DEEPER OUR CONNECTION WITH THE MUSIC.

Bravo AV Consulting only sells products that allow you to discern a distinct improvement in quality. It does not take a trained or “Golden Ear” to know what sounds good. If you’ve ever seen quality high definition TV, you likely don’t want standard definition anymore. The same holds true with a good audio system. Once you’ve heard quality audio and are moved by the music, you don’t want to go back to mediocre sound.

Because music is important, re-creating it with the highest possible fidelity is important.

The average person isn’t expected to have the technical knowledge or specific vocabulary of an A/V expert, but most people *do* have a practical knowledge of things they like and can communicate their preferences. Bravo AV talks with our customers using straightforward, non-technical vocabulary to pinpoint their needs and desires, and then exceeds their expectations with the finest quality sound.

Come in and hear the difference.
