Criteria for Acoustical Performance

Audio Performance Requirements (please choose one):

- Excellent (suitable for critical music listening; near-studio quality)
- Very Good (good for film soundtracks; OK for music but not suitable for critical listening)
- Adequate (subordinate to aesthetic criteria)

Criteria for Noise transfer (isolation) to and from adjacent spaces

- Extensive Isolation (sound within Theatre may be relatively loud but doesn't intrude into adjacent living spaces). (Requires physical space within shell to accomplish.)
- Noticeable reduction in noise transfer, but not completely isolated. (Requires some physical space but less space than required by more extensive isolation.)
- Pay no attention to isolation. (Maximize interior space.)

Criteria for Video Performance (Image Quality)

- Excellent (image nearly film quality; accurate rendering of colors & hues; compatible with pending High Definition TV)
- Very Good (image quality still above average; color rendering is still good but not a priority over décor; capable of displaying High Definition TV images albeit with minor reductions to absolute quality)
- Adequate (subordinate to aesthetic criteria)
